

The image shows two circular metal pulleys side-by-side. The pulley on the left is labeled 'POULIE USINE' and has a double-flange design with a central bore. A vertical double-headed arrow indicates the distance between the two flanges. The pulley on the right is labeled 'POULIE ORIGINE' and has a single-flange design with a central bore. Both pulleys have a series of small, pointed teeth around the outer edge of the flange. They are resting on a dark, textured surface.

POULIE USINE

POULIE ORIGINE
