A diagram showing a circular coil with four concentric loops. A vertical dashed line passes through the center of the coil. To the left of the coil, there is a horizontal axis with an upward-pointing arrow and the letter 'A' above it.

A technical drawing of a mechanical part, likely a bracket or support. The part features two vertical columns with diagonal hatching. A horizontal slot is positioned between these columns. Dimension lines indicate a height of 4 for the left column and a width of 3 for the right column. A surface finish requirement of $R0.5 \pm 0.3$ is specified for the top edge of the right column. A note at the bottom right indicates a feature with a slope of 1:5.

70. 6 ± 0.1

A technical drawing of a mechanical part. The top horizontal dimension is labeled $\phi 25 \text{ g}6$. A vertical dimension line on the left indicates a height of 1. Two vertical slots are shown; the left one has a width of 1 and a depth of 30° from the bottom edge. Two through-holes are located at the top of the slots, with a diameter of $\phi 5.2 \pm 0.1$.
